

WINAR CONNECTION, INC.

VALUE ADDED DEPARTMENT

simplifying harnesses

Advanced All-In-One Technology

- High performance and short setup times
- Simple operation with state-of-the-art software and touch screen
- Easy network integration
- 0.13 to 6 mm² (26 - 10 AWG)
- High-quality crimping, sealing, twisting and tinning
- Custom Ink Jet Printing
- Cutting and Stripping

- Electrical stripping machine for wires and cables up to 5.5 mm (0.22") O.D. Strips lengths up to 46 mm (1.81")

Custom Precision Large Cable Cutting

These semi-custom cut and strip machines can process cable from 8 awg (12mm) - 252 MCM (37mm). They can also process multi-conductor cable up to 325 feet long from 6.5 inches at a

maximum diameter of 37mm. Our large cutting machines give us the ability to precisely cut and strip wire without cutting or damaging any strands. We can also process cable at speeds up 138"/sec, giving us the capability to cut over 100,000 feet of cable in a single production shift.

Large Lug Crimping

Our large lug crimpers give us a large advantage and great versatility in crimping. These crimpers have electronics and air boosts to control and maintain speed and consistency. have 2 different large lug crimpers. We have 6 400 series crimpers along with

- 400 Series terminal ranges between 8awg to 2awg
- 500 Series terminal ranges between 2awg and 252 MCM
- Both can crimp insulated and non-insulated terminals
- Both have ferrule crimping ability
- Both can crimp various manufactured lugs in the industry

CUSTOM CRIMPING SOLUTIONS

Our Molex crimpers TM-4000 (shown) and TM-3000 give us a superior and accurate crimp. The TM-4000 is a 4.7 ton press used for insulated and non-insulated terminals up to 2awg. This is one of our most versatile machines. The TM-3000 is a 2.7 ton press that offers similar results just at smaller wire sizes.

Crimping Core Abilities:

- Mini Applicators/Mini Fit
- Mini Fit Sr.
- MLX Power Connectors
- Standard .093
- Standard .062
- Micro Fit
- KK Interconnection System
- PICO Blades
- SL Modular Connectors

EMPLOYEES

Winar Connection, Inc. is proud to be a family run organization. We have over 40 fulltime employees. Five of these employee's have 25 years of service and another 10 have celebrated their 10 year anniversary. One of our keys to success, is that our employees care and are always willing to help a customer.

Custom Bagging/Labeling

Winar Connection, Inc. is authorized to re-bag electrical products. This gives us the ability to break down UL labeled electrical products from a bag of 1000 to a bag of 100 and still retain the UL listing. You may find it convenient to purchase even larger quantities of terminals and cable ties in 100 bag quantities. They are easier to store, inventory and distribute to those who need them.

Recently we have added custom labels to our Value Added capability. This has been one of our most successful Value Added attributes. Below you can see an example of our custom labeling. Winar Connection, Inc. can include on this label many different items including: Your Company Name, Your Company Logo, Manufacturer's Part Number, Suggested Strip Length, Suggested Hand Tool or Die#, Part Quantity, Stock Location, Plant #, Plant Location and Bar Coding. A bar code scanner can greatly decrease the amount of time it takes to check inventory, check in new stock or reorder products.

Wire Harness/Custom Assembly

From single crimps to whole Harnesses, let Winar Connection, Inc. be your source for wire harnesses and more. With the rising costs of labor and tooling, often the most cost effective way to

buy your electrical terminals are in a finished product. If your wire harness needs are predictable, you may want to let us build your wire harness for you. Let our highly trained and capable staff build your wire harnesses allowing

you to reallocate your skilled labor force to more important needs. We are capable of manufacturing a wide range of harnesses, from a single wire two crimp harness to multi wire multi crimp harnesses including loom, heat shrink and other needs. We are also capable of doing more complex harnesses including multiple solder type connectors. All harnesses are tested and inspected before we ship them out to you.

Flexible Solutions For Your Business Needs

Winar Connection, Inc. is a stocking distributor and also specializes in Vendor Maintain Inventory (VMI) for many customers. We have over 20,000 sq. ft. of warehouse space. We take pride in our ability to strategically maintain our levels of inventory

Custom Assembly

- Low-Voltage harnesses
- High Voltage harnesses
- Battery Cables
- Multi-layered harnesses
- Fuse Blocks
- Military Connectors/Soldering
- Braiding capability
- Cam-lok Connectors
- Kitting/Bagging
- Wrap Labels/Hot Stamping/Ink Jet/Heat Shrink
